

Maven and Selenium Dependencies

Maven

Notes

<https://github.com/joshking1/Maven-and-Gradle-Notes.git>

integrate maven – declarative pipeline

integrate maven – scripted pipeline

Maven repository

Pom.xml

A Project Object Model or POM is the fundamental unit of work in Maven. It is an XML file that contains information about the project and configuration details used by Maven to build the project.

Other information such as the project version, description, developers, mailing lists and such can also be specified.
